ABOUT ME

BS Software Engineering student at International Islamic University Islamabad with hands-on experience building full-stack web applications using the MERN stack. Proficient in TypeScript, REST API design, JWT authentication, and Redux state management. I enjoy building scalable, maintainable software and thrive in collaborative, learning-focused environments.

PROJECTS

Video Sharing Platform (Ongoing Personal Project)

React · TypeScript · Node.js · Express.js · MongoDB · Redux Toolkit · Passport.js · JWT · Tailwind CSS · Vite · Axios · Mongoose · REST API

- Built a full-stack video sharing application with a React/TypeScript frontend (Vite) and an Express/Node.js/MongoDB backend.
- Implemented JWT-based authentication using Passport.js, including secure sign-up, sign-in, and protected route flows.
- Designed and consumed RESTful APIs with versioned endpoints (/api/v1) for scalability and backward compatibility.
- Managed global application state with Redux Toolkit (createAsyncThunk, extraReducers) and connected it to React components via typed hooks (useSelector, useDispatch).
- Implemented user profile fetching with the two-state pattern: syncing Redux global state into local component state via useEffect for controlled form inputs.
- Integrated Axios for HTTP requests with Bearer token authorization headers for protected backend routes.
- Applied ATS-friendly development practices: modular folder structure, DRY utilities (sendResponse), and TypeScript strict typing throughout the codebase.
- Debugged full-stack data pipeline issues (Backend → Axios → Redux Thunk → Redux State → useSelector → React) using Postman, Redux DevTools, and browser console.

EXPERIENCE

Front-End Developer Intern — SWIS MAX Company

Jun 2025 – Sep 2025

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript (ES6+).
- Applied mobile-first design principles and functional programming patterns.
- Worked with DOM manipulation and version control using Git & GitHub.

Online Marketer — E-Commerce (Shopify)

Self-Employed | Islamabad, Pakistan

- Managed product listings, order processing, fulfilment, and customer communication.

Frontend	React.js, Redux Toolkit, React Router DOM, Tailwind CSS, Vite, Axios
Backend	Node.js, Express.js, REST API Design, JWT Authentication, Passport.js, bcrypt
Database	MongoDB, Mongoose ODM, Oracle Database
State Mgmt	Redux Toolkit (createAsyncThunk, extraReducers, createSlice), React Hooks
Dev & Debug	Postman, Redux DevTools, Browser DevTools, Git, GitHub, VS Code

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, C++, HTML5, CSS3
Concepts	OOP, Data Structures, Algorithms, MVC, API Versioning, DRY Principle, Software Design

EDUCATION

BS Software Engineering	— International Islamic University Islamabad
<i>Sep 2023 – Present</i>	
Intermediate (Pre-Engineering)	— Pakistan Scout Cadet College Batarasi, Mansehra
<i>Aug 2021 – Jul 2023</i>	
Matriculation	— Pakistan Scout Cadet College Batarasi, Mansehra
<i>Mar 2019 – Aug 2021</i>	

LANGUAGES

Urdu (Native) | English (C1 Listening · B2 Reading · C1 Speaking · B2 Writing)
